

Dermanor

- story from real life

Project: Dermanor A/S, Roskilde
Product: Sysco® and wall-hung Media 100
Storage of: Office articles
Month / year: September / 2007
Delivered by: Constructor Danmark A/S

When Dermanor moved into their new facilities, Constructor got the assignment of designing a printer / copy room with capacity for storage of office supplies. The room had special dimensions (trapezium shaped) and a.o. a fire cabinet and technician door which had to be taken into consideration.

Solution:

A stationary Sysco in full height (2200 mm) was placed up the "long" wall in the room. The Sysco has 4 shelves and 4 suspension shelves which contain smaller office supplies. Next to this stationary Sysco are placed 2 smaller Sysco shelves with top plate in order to create a working station for laminating, packing etc. Above this working station on the same wall and the adhering wall are installed wall-hung Media shelving.
